

Wind Power Survey

Bristol & Portsmouth Town Councils want your opinion

Funded by the Rhode Island Energy Office
Developed by Leteris Pavlides PhD AIA

Roger Williams University
Learning to Bridge the World

Narration:

Thank you for participating in the Wind Power Survey for Bristol and Portsmouth. Bristol and Portsmouth Town Councils want your informed opinion, to help them make decisions on wind power.

With the cost down to about five cents a kilowatt hour, wind power is competitive with natural gas. Clean, renewable, energy is not an economic or technical problem, it is a political problem. While huge vested interests provide resistance to change, there are forces stronger than these interests, market forces.

Technical Notes:

(1) This survey has been optimized for Internet Explorer (IE) and Apple QuickTime. Narration may not be heard if you use browsers other than IE or do not have Apple QuickTime installed.

(2) Survey access requires pre-registration and a special coded link provided to you via email. Please do not bookmark this survey. For results to be recorded, entry **MUST** be via the provided link. Do not provide this link to others. It is specially coded for you and multiple entries will not be recorded.

(3) Adapted for the Internet by Bill Saslow, Raytheon Employees Wildlife Habitat Committee ([REWHC](#)).
